

**Infinet** is a solution to the short life cycle of traditional basketball nets in schools and public spaces. 'Without a net, there is no game'. It is widely acknowledged that a basketball ring without a net will only get a fraction of the use compared to a ring with a net. A basketball court is an investment in the physical health, enjoyment and wellbeing of all users. The net is a critical part of this equation.

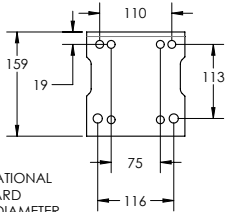

Monash Institute of Pharmaceutical Sciences

Much like a traditional net, Infinet serves many purposes:

- **Infinet** breaks the balls fall, encouraging it to drop vertically. Without a net, players are constantly forced to chase runaway balls.
- **Infinet** increases the profile depth of a ring, making it easier for players to judge distance quickly when aiming for a shot.
- **Infinet** provides a visual indication that the ball has passed through the ring. Without any form of net, it can be very hard to judge at given angles.
- **Infinet** also provides an audible indication, producing a pleasing whip note that mimics a traditional net.

Ø458 INTERNATIONAL STANDARD HOOP DIAMETER

Ø24

Infinet offers a safe, extremely durable and sustainable alternative to a net-less ring, or the constant upkeep of nets used on high traffic outdoor courts.

**Infinet** is designed to keep players coming back and enjoying the court for many years.

*Infinet is breathing life back into forgotten courts.*

*Each durable fin is protected closely under the ring and is incredibly hard to grip should a vandal be able to make the near 10 foot leap.*

*Powder-coated, solid steel ring provides a durable foundation for the Infinet fins.*

*Soft TPU outer with reinforced core allows the fin to flex, directing the flight path of the ball.*
